

**Your shortsea partner to & from the UK & Ireland**

↘  
**Benefits**

5 operators

11 weekly container sailings to 10 destinations

Sustainable, reliable and rapid shortsea services

Unique inland location of the port closer to key European markets

Multimodal transport hub offering extensive rail, barge, shortsea and road services to the entire European continent

## **Expanded shortsea offer for the UK & Ireland**

Port of Antwerp offers British and European shippers and forwarders a **competitive, sustainable, reliable** and **rapid transport alternative** to road haulage, so that each day – also after Brexit – cargo reaches its final destination **“just-in-time”**.

**It is one of the key priorities of the Port of Antwerp to enhance our shortsea network with the UK & Ireland. Hence, we are pleased to announce 2 new services, extensively expanding our short-sea offer to and from the UK.**

**Michiel Vermeiren,**  
*Shipping Lines Manager*  
ANTWERP PORT AUTHORITY

## Competitive & sustainable transport

Compared to traditional road transport, shortsea is more sustainable and can yield significant cost savings:

Congestion on the road and long waiting periods are avoided. And for long distances, truck transport faces a shortage of drivers.

The port's 80 km inland location means vessels can load/unload their cargo closer to the largest consumption and production areas.

## Rapid & reliable shortsea services

The Port of Antwerp offers very rapid and reliable shortsea services to the UK and Ireland with short transit times. This is due to:

- the presence of dedicated shortsea terminals
- the high productivity of the Antwerp terminals
- the efficient operation of intra-port traffic

## Flexible, efficient onwards transport

For onwards transport to European destinations, Antwerp offers a dense network of roads, railroads and inland waterways with highly frequent services. A vast array of regular deepsea and shortsea services allows to easily and reliably transport British and Irish cargo to overseas destinations nearby or far away.
